PROFESSIONAL SUMMARY

High level experience in Web design and development knowledge, creating supreme quality web pages with an upper hand in frontend development. Most recent work I created include the use of neomorphism UI designs, parallax effect web pages, and WebAR experiences using technologies like three.js, aframe and 8thwall.

EXPERIENCE

Experience in Web Development from working for various competitions and open source contributions.

Studying at IIT BHU gave me an opportunity to build a website for their annual socio-cultural festival known as kashi yatra or ky, followed by creating various self-made repositories, and open source contributions, along with several websites deployed using GitHub pages or netlify.

EDUCATION

Indian institute of technology, Varanasi (IIT-BHU)

Integrated dual degree (IDD), Metallurgical engineering, Present

Skills

UI Design / Graphic design | Web Development

Specialization

Specialized in WebAR/VR part of web development; creating websites with image targets to load a glb/ obj/ gltf model on image detection, and 3d holograms of .hvrs format that can be viewed with the help of AR supported phones.
